

Bitrix Intranet

version 11.5 presentation

What is new in version 11.5?

- **Social Interfaces and new collaboration scenarios;**
- **Activity Stream and Conversations;**
- **Brand new Instant Messenger and Contacts**
- **Improved design and usability in Workgroups**
- **New concept for working in the Extranet**
- **Tasks and CRM integration in Business Processes**
- **Drag-n-Drop Visual Company Structure**
- **Redesigned Calendars and Absence Chart**
- **Fresh look of the product and new pricing**

Classic Intranet and Social Intranet

The screenshot displays the Bitrix Intranet Configuration interface. On the left, a sidebar shows a navigation menu with links for Company, Employees, Documents, Services, and Workgroup. Below this is a 'Personal Dashboard' section with a 'Birthdays' list featuring names like Isabel Cross, Paul Wright, Andrew Samuelson, Joshua Presley, and Louise Colville. The main area is titled 'Bitrix Intranet Configuration' and features a 'Design Template' section. This section includes a list of 11 configuration steps, with '2 Design Template' selected. Below the list are two preview images: 'Classic Intranet' and 'Social Intranet'. The 'Classic Intranet' preview shows a traditional dashboard layout, while the 'Social Intranet' preview shows a more social-oriented layout with a 'My Tasks' section and a 'Popular Posts' section. The 'Social Intranet' preview also includes a 'Birthdays' section. The interface is branded with the Bitrix logo and the text 'BITRIX'.

Classic Intranet

This design conforms to classic intranet trends while accommodating social aspects of the Intranet. This interface includes dashboards and offers cascading menus.

Social Intranet

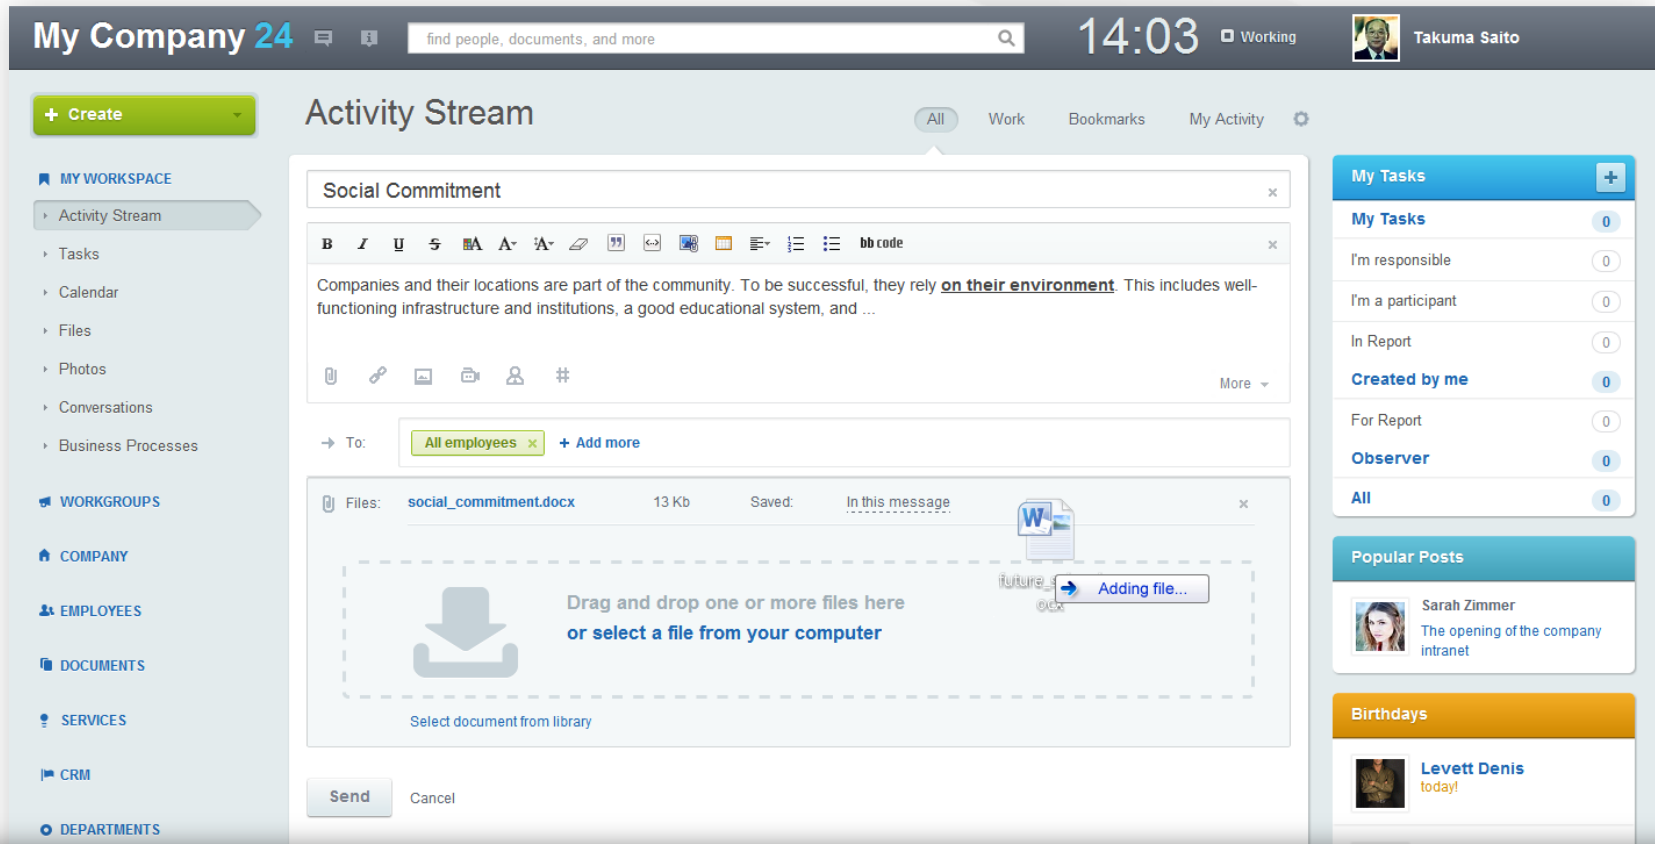

This template is designed for accenting the social aspects of the intranet and combines conventional authoring and productivity tools in a context that facilitates social communication. The Bitrix24 layout is a highly intuitive productivity booster and requires minimal time for adoption and orientation.

BITRIX

Bitrix Intranet 11.5 provides two product templates to choose from, depending on the desired user experience: a Classic Intranet template, and a new Social Intranet template that gives prominence to social interaction.

The screenshot displays the Bitrix Social Intranet template interface. At the top, a dark header bar contains the company name "My Company 24", a search bar with the placeholder "find people, documents, and more", the time "14:03", a status indicator "Working", and a user profile for "Takuma Saito".

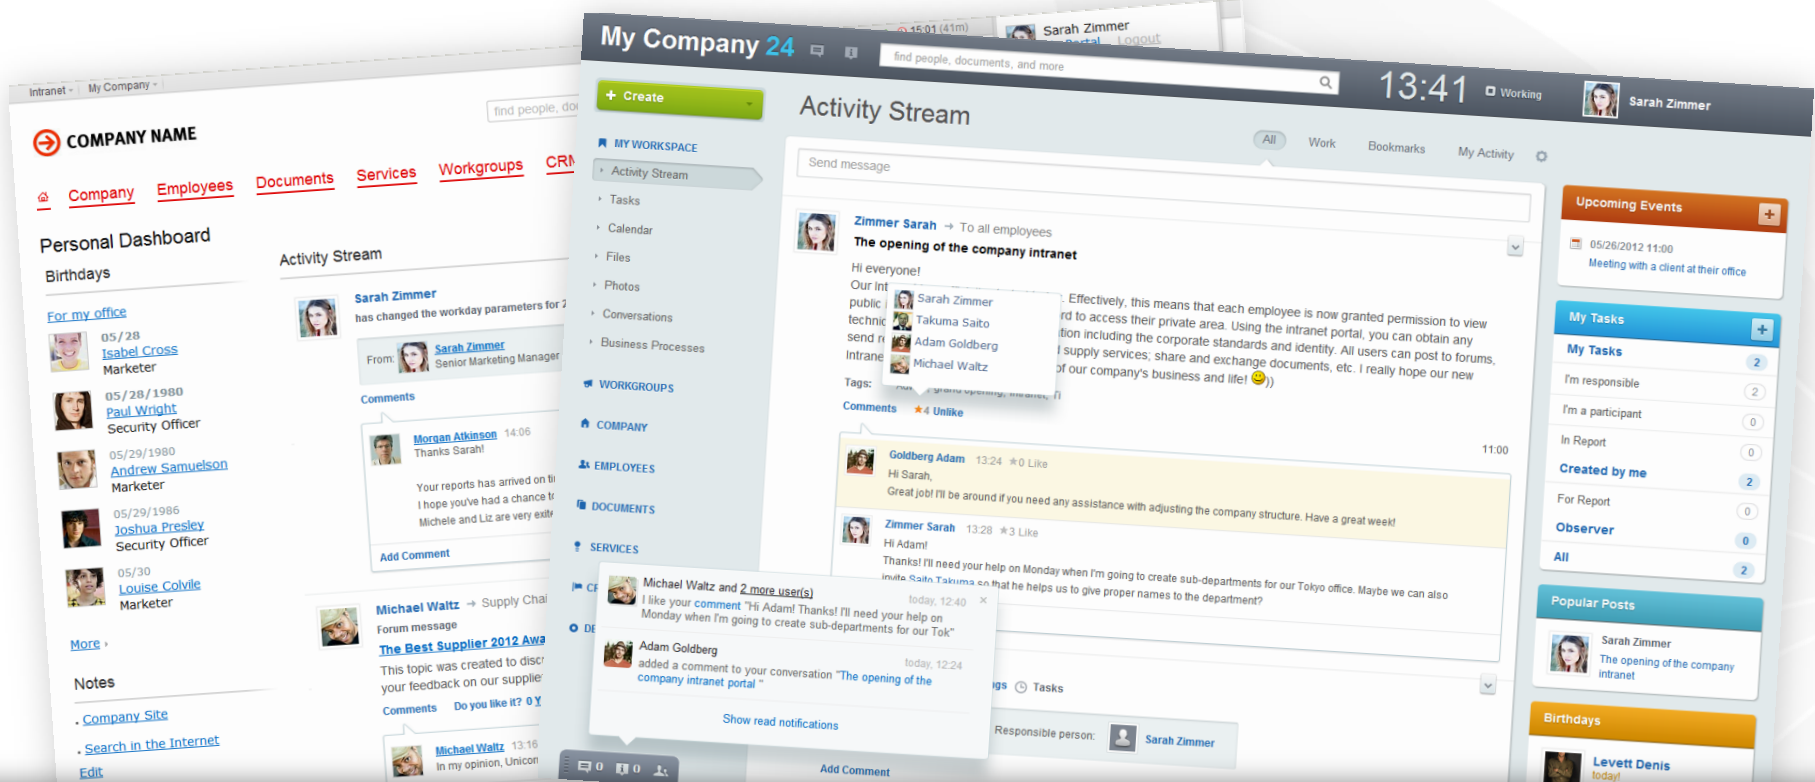

The main content area is titled "Activity Stream". On the left, a sidebar menu lists navigation options: "MY WORKSPACE" (with sub-items like Activity Stream, Tasks, Calendar, Files, Photos, Conversations, Business Processes), "WORKGROUPS", "COMPANY", "EMPLOYEES", "DOCUMENTS", "SERVICES", "CRM", and "DEPARTMENTS".

The central "Activity Stream" section shows a post titled "Social Commitment". The post content reads: "Companies and their locations are part of the community. To be successful, they rely on their environment. This includes well-functioning infrastructure and institutions, a good educational system, and ...". Below the text is a rich text editor toolbar and a "To:" field with a dropdown menu showing "All employees" and a "+ Add more" button. A file attachment section shows a document named "social_commitment.docx" (13 Kb) with a "Send" button and a "Cancel" button. A large dashed box prompts the user to "Drag and drop one or more files here or select a file from your computer".

On the right side, there are two panels. The "My Tasks" panel lists tasks with status indicators: "My Tasks" (0), "I'm responsible" (0), "I'm a participant" (0), "In Report" (0), "Created by me" (0), "For Report" (0), "Observer" (0), and "All" (0). The "Popular Posts" panel shows a post by "Sarah Zimmer" titled "The opening of the company intranet". Below it, a "Birthdays" panel shows a birthday for "Levett Denis" today!

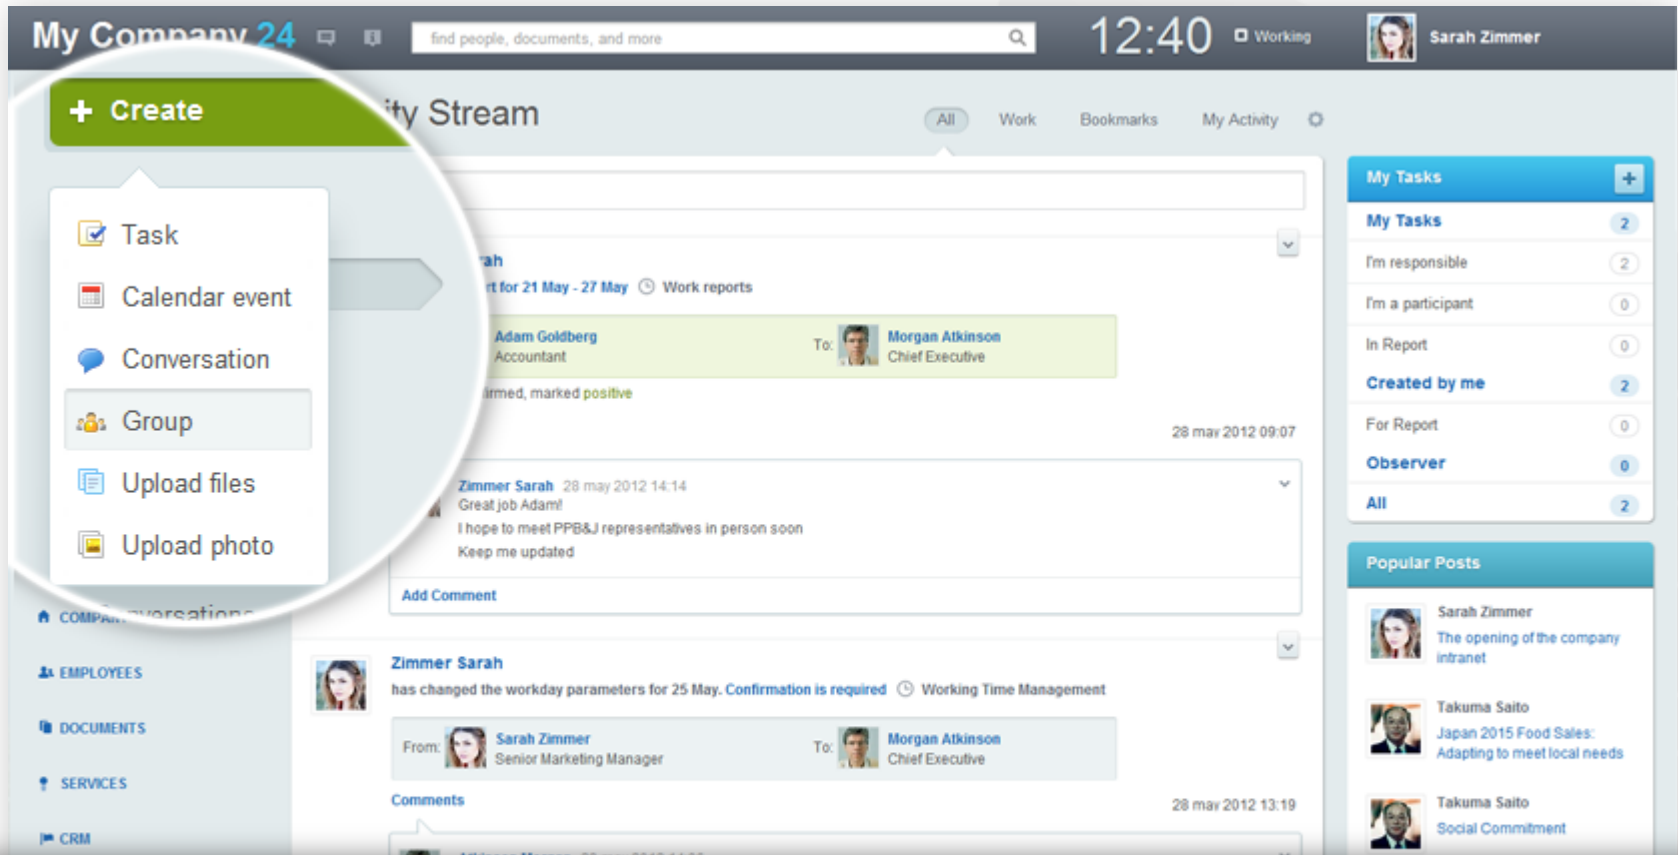

The new template greatly simplifies navigation and reduces the time needed for new employees to get completely comfortable in the environment. All tools, buttons, menus, etc. are intuitive and always at hand.

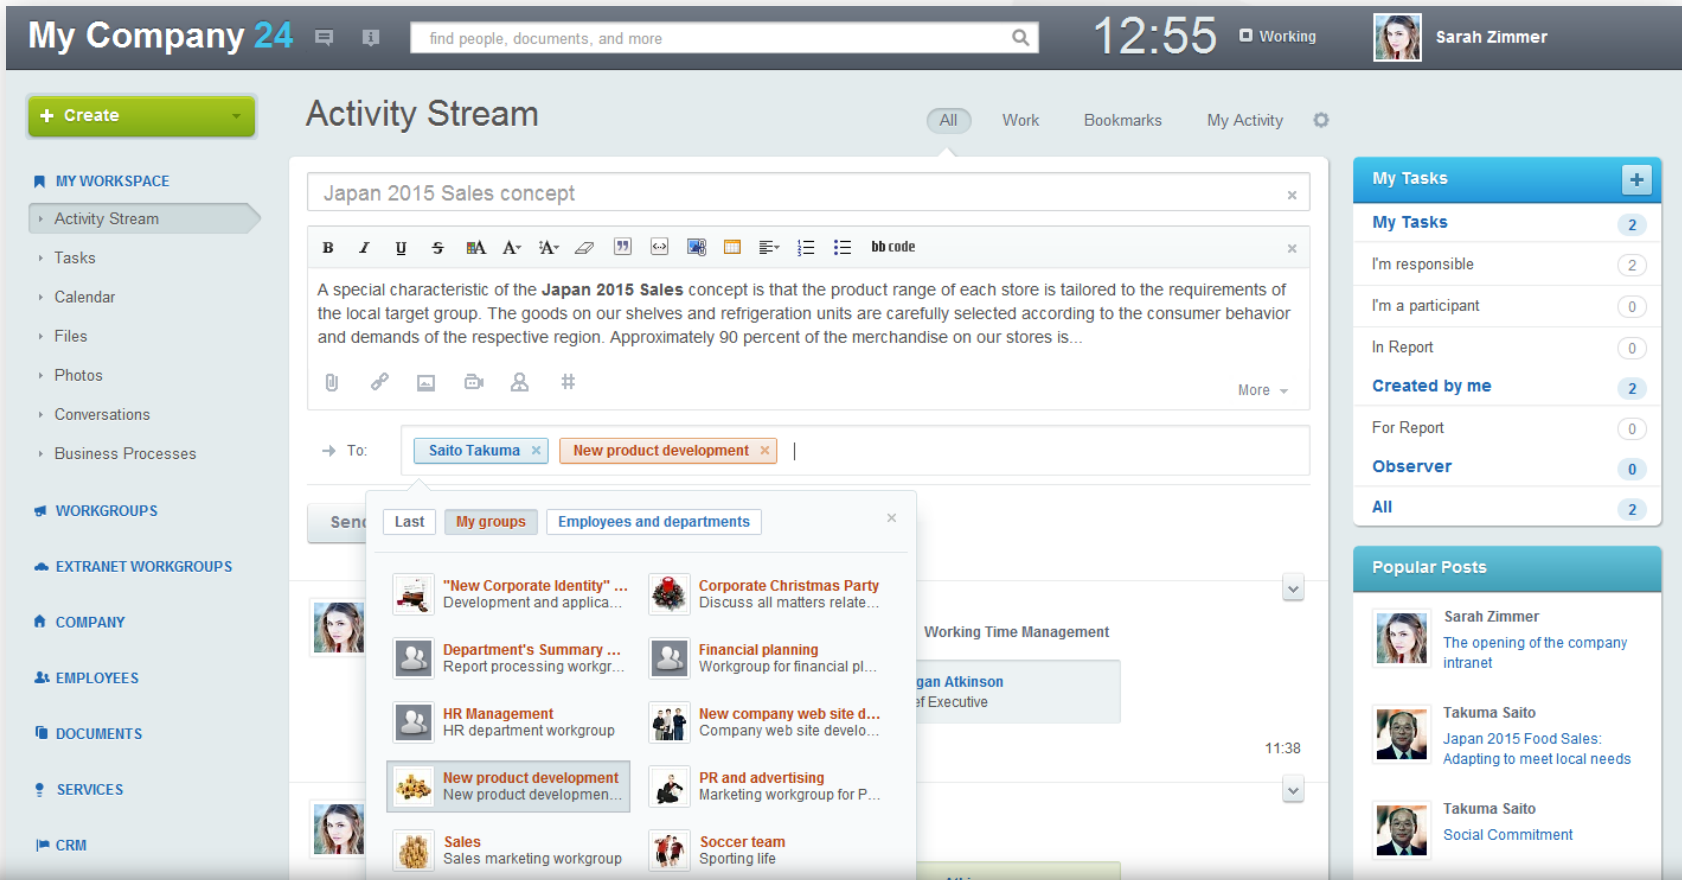

The screenshot displays the Bitrix Activity Stream interface. At the top, the header shows 'My Company 24' and a search bar. The main content area is titled 'Activity Stream' and features a sidebar with navigation options like 'MY WORKSPACE', 'WORKGROUPS', 'COMPANY', 'EMPLOYEES', 'DOCUMENTS', and 'SERVICES'. The central feed shows various activity items, including a post by Sarah Zimmer about the company intranet, a comment by Michael Waltz, and a task by Adam Goldberg. The right sidebar contains sections for 'Upcoming Events', 'My Tasks', 'Popular Posts', and 'Birthdays'.

The Activity Stream is a single-point for employees to get updates on projects and workgroups, carry on discussions with colleagues, view comments, receive documents and files, and manage or create new tasks, etc.

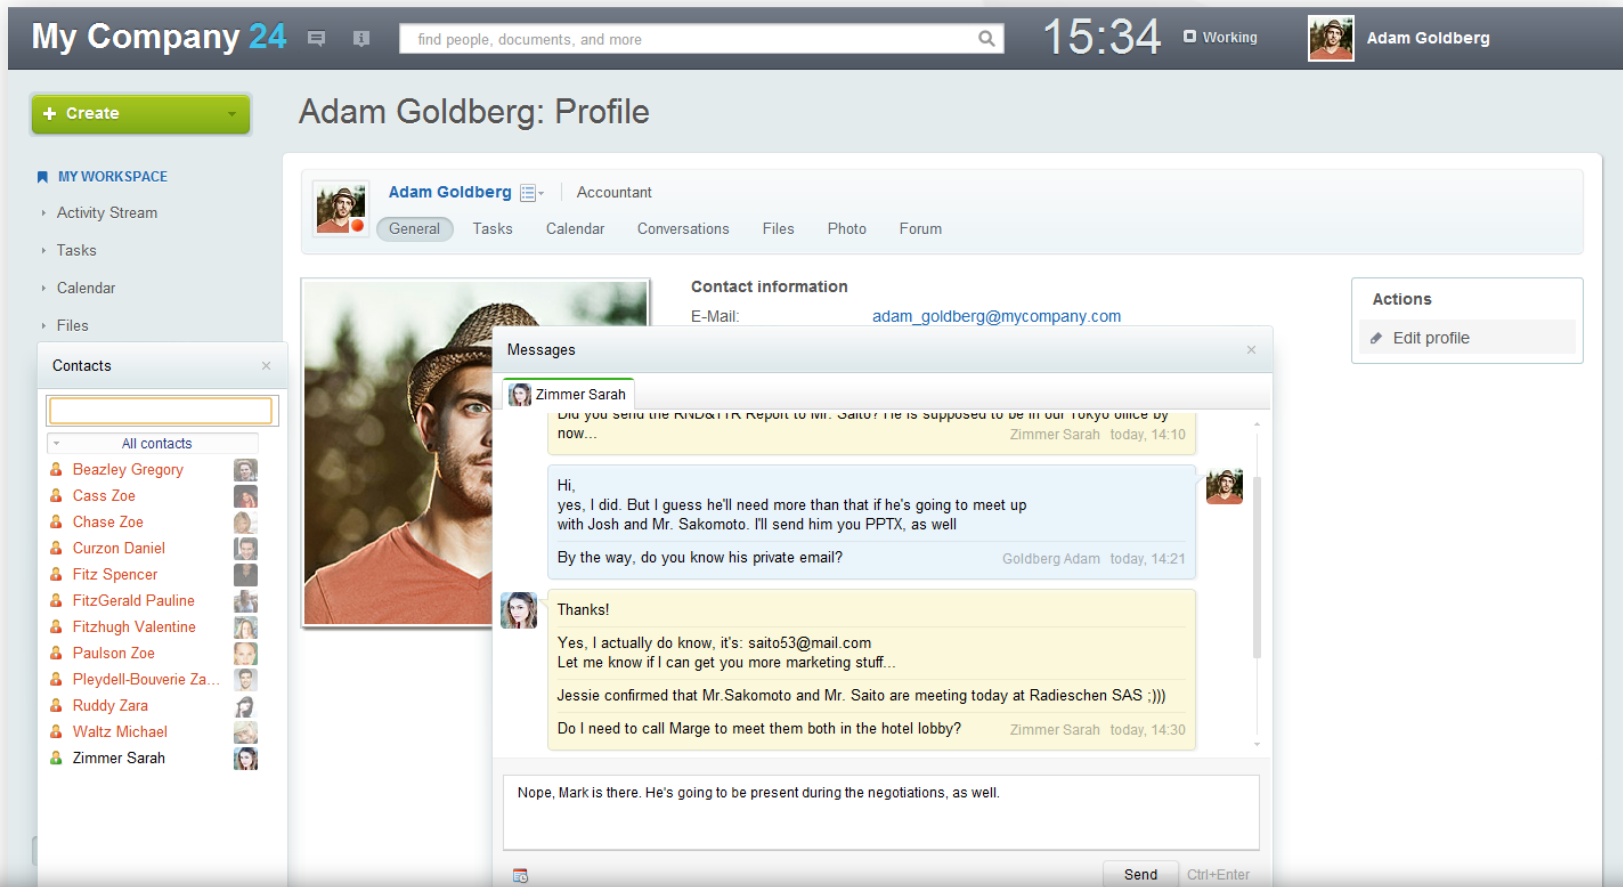

The Create Button (only in Social Intranet template) reduces excess navigation inside the Intranet allowing intranet users to initiate tasks, send messages, schedule calendar events, upload files and even create new workgroups.

The screenshot displays the Bitrix Activity Stream interface. At the top, the header shows 'My Company 24', a search bar with the text 'find people, documents, and more', the time '12:55', and the user 'Sarah Zimmer'. The main content area is titled 'Activity Stream' and features a 'Create' button. A sidebar on the left lists navigation options: 'MY WORKSPACE' (Activity Stream, Tasks, Calendar, Files, Photos, Conversations, Business Processes), 'WORKGROUPS', 'EXTRANET WORKGROUPS', 'COMPANY', 'EMPLOYEES', 'DOCUMENTS', 'SERVICES', and 'CRM'. The central activity stream shows a post titled 'Japan 2015 Sales concept' with a rich text editor and a 'To:' field containing 'Saito Takuma' and 'New product development'. A dropdown menu is open, showing a list of workgroups and departments, including 'New Corporate Identity', 'Corporate Christmas Party', 'Department's Summary', 'Financial planning', 'HR Management', 'New company web site d...', 'New product development', 'PR and advertising', 'Sales', and 'Soccer team'. On the right, there are two sidebars: 'My Tasks' with a list of tasks and counts, and 'Popular Posts' with a list of posts and counts.

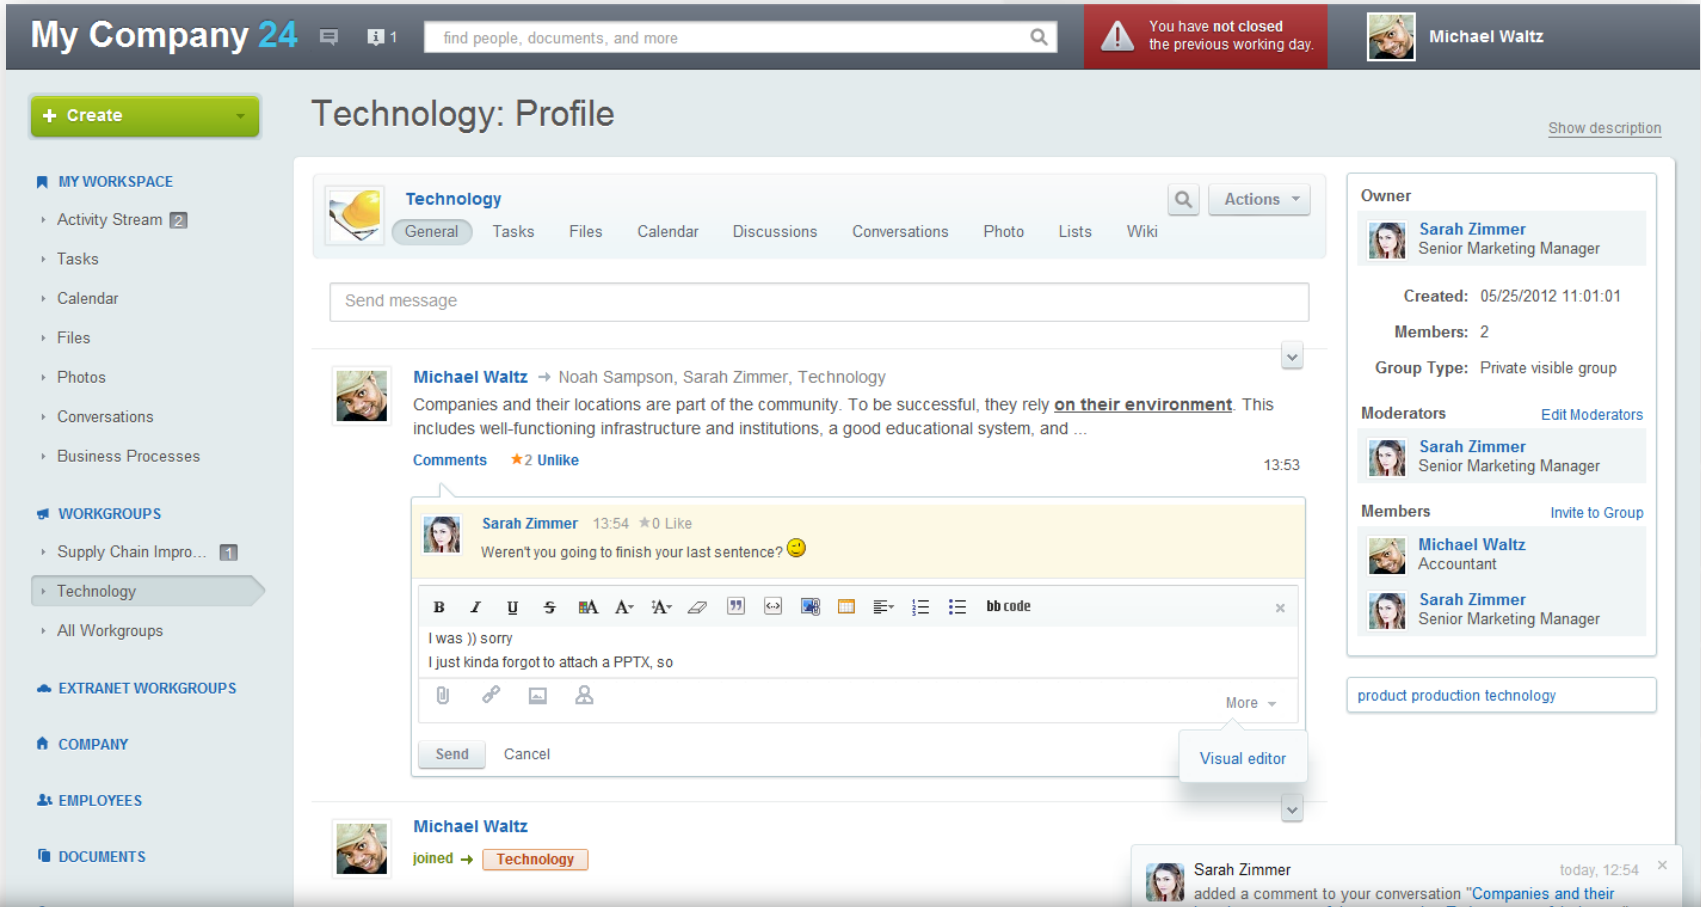

Messages or Conversations that show up in the Activity Stream are received by individuals or workgroup team users. Each conversation can be continued with comments or attached files, photos, and videos.

The screenshot displays the Bitrix web interface. At the top, a dark header bar contains the text "My Company 24", a search bar with the placeholder "find people, documents, and more", the time "15:34", a status indicator "Working", and a user profile for "Adam Goldberg". Below the header, a green "+ Create" button is visible. On the left, a sidebar lists "MY WORKSPACE" with links to "Activity Stream", "Tasks", "Calendar", and "Files". A "Contacts" panel is open, showing a list of contacts including Beazley Gregory, Cass Zoe, Chase Zoe, Curzon Daniel, Fitz Spencer, FitzGerald Pauline, Fitzhugh Valentine, Paulson Zoe, Pleydell-Bouverie Za..., Ruddy Zara, Waltz Michael, and Zimmer Sarah. The main content area shows the "Adam Goldberg: Profile" page. It includes a profile picture, a "General" tab, and a "Contact information" section with the email "adam_goldberg@mycompany.com". An "Actions" button labeled "Edit profile" is present. A "Messages" window is open, showing a conversation with Zimmer Sarah. The messages include: "Did you send the RNDXTRK Report to Mr. Saito? He is supposed to be in our Tokyo office by now..." (Zimmer Sarah, today, 14:10), "Hi, yes, I did. But I guess he'll need more than that if he's going to meet up with Josh and Mr. Sakomoto. I'll send him your PPTX, as well. By the way, do you know his private email?" (Goldberg Adam, today, 14:21), "Thanks! Yes, I actually do know, it's: saito53@mail.com. Let me know if I can get you more marketing stuff... Jessie confirmed that Mr. Sakomoto and Mr. Saito are meeting today at Radieschen SAS :))) Do I need to call Marge to meet them both in the hotel lobby?" (Zimmer Sarah, today, 14:30), and "Nope, Mark is there. He's going to be present during the negotiations, as well." (Goldberg Adam, today, 14:30). The interface also shows a "Send" button and a "Ctrl+Enter" shortcut.

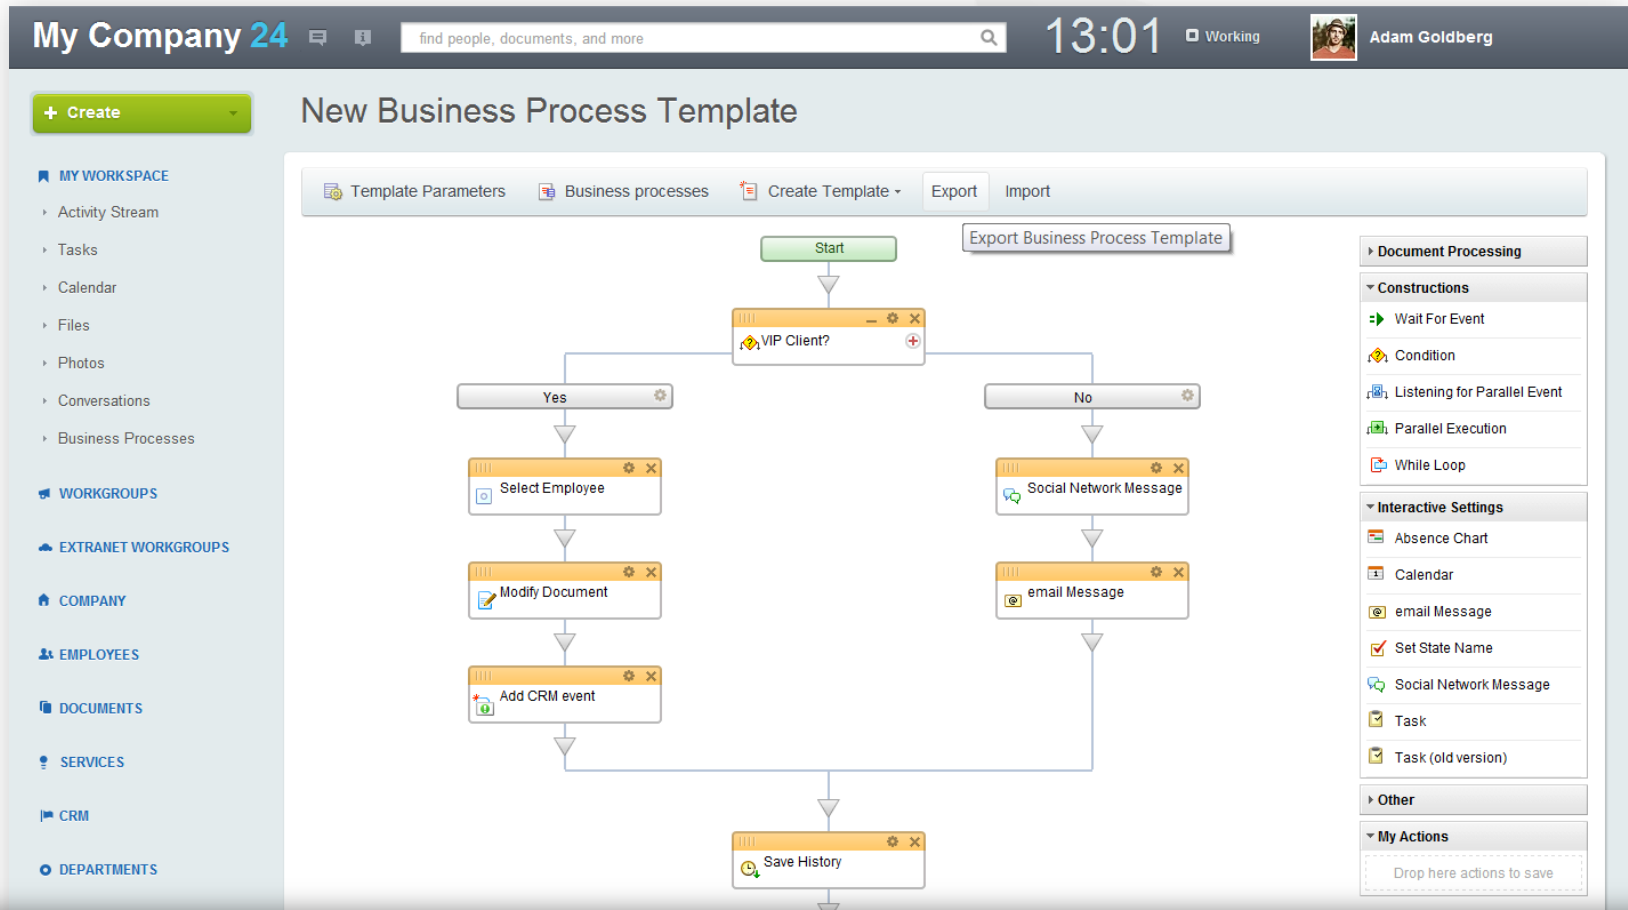

The built-in Instant Messenger is a perfect way to communicate quickly without interrupting work and get updates (notifications) on task and document changes. IM has a full, searchable archive of messages, as well.

The screenshot displays the Bitrix Workgroups interface. At the top, a dark header bar contains the company name 'My Company 24', a search bar with the text 'find people, documents, and more', a notification banner stating 'You have not closed the previous working day.', and the user profile of Michael Waltz. The left sidebar features a navigation menu with sections: 'MY WORKSPACE' (Activity Stream, Tasks, Calendar, Files, Photos, Conversations, Business Processes), 'WORKGROUPS' (Supply Chain Impro..., Technology, All Workgroups), 'EXTRANET WORKGROUPS', 'COMPANY', 'EMPLOYEES', 'DOCUMENTS', and 'SERVICES'. The main content area is titled 'Technology: Profile' and includes a 'Send message' input field. Below this, a post by Michael Waltz is shown, followed by a comment from Sarah Zimmer. A rich text editor is open for Sarah's comment, showing a toolbar with various formatting options and a 'Visual editor' button. The right sidebar provides details about the 'Technology' group, including the owner Sarah Zimmer, creation date (05/25/2012 11:01:01), members (2), group type (Private visible group), moderators, and a list of members.

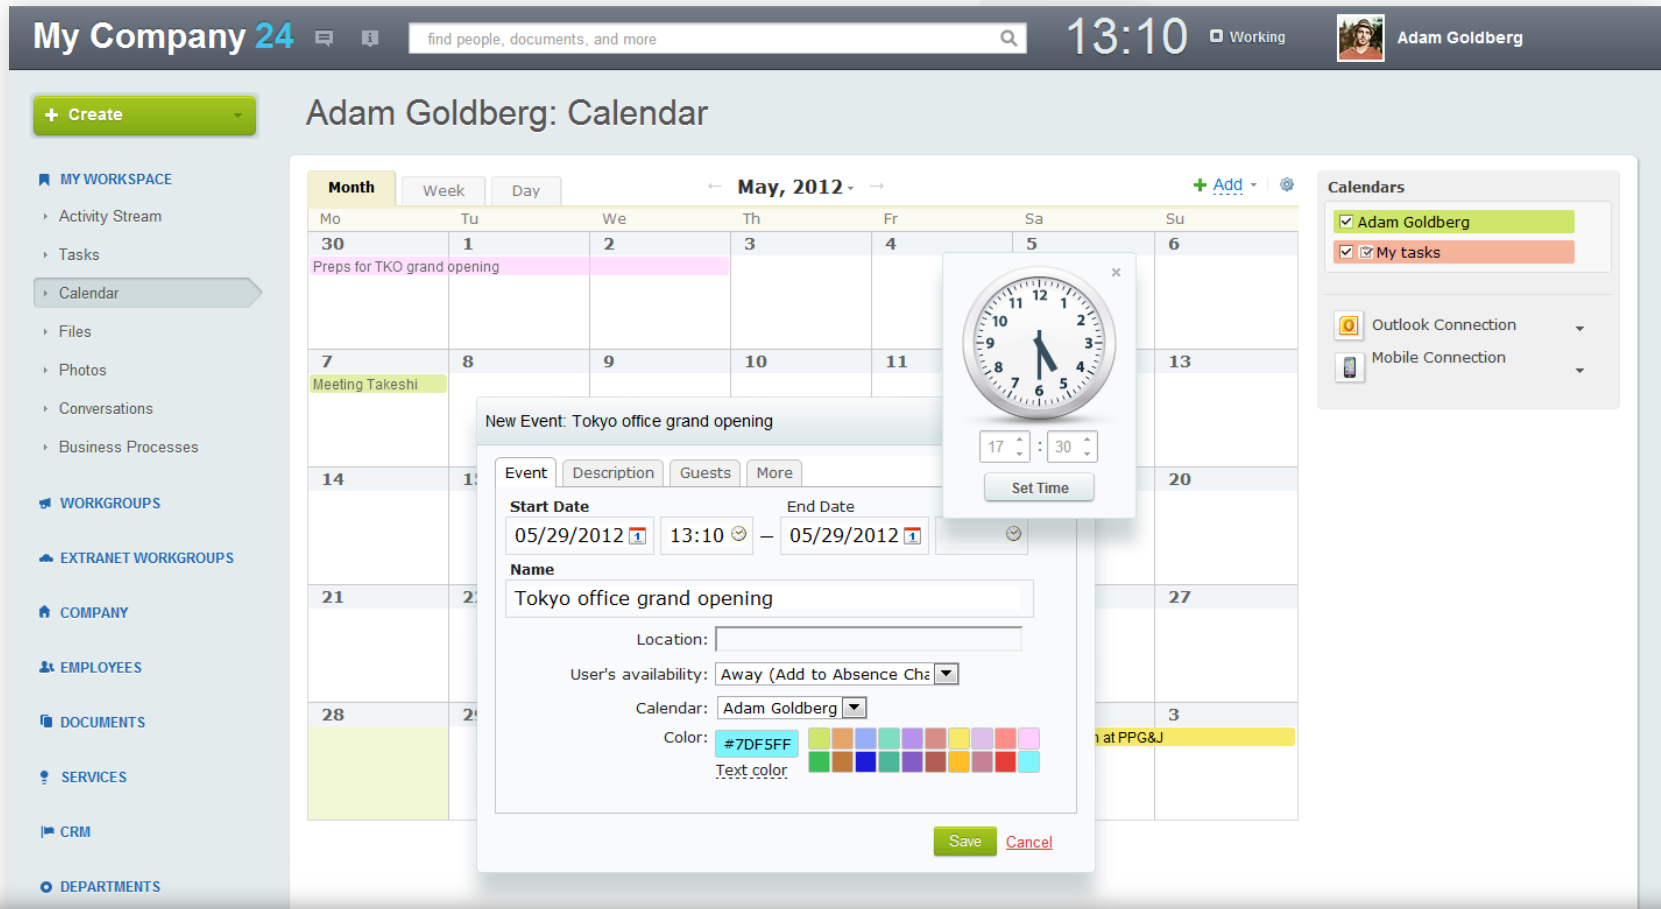

The design and navigation within Workgroups are significantly rearranged, with more reliance on the Activity Stream. Tasks, photos, liking, and comments can all be viewed and worked on from the Activity Stream.

In version 11.5, the Business Processes module integrates with Tasks and the CRM. This integration allows for creating new tasks, processing leads and even generating automatic reports at any stage of a Business Process.

The new Company Structure employs drag-and-drop technology for moving employees, creating departments, and specifying department heads. These changes will also influence reporting and tasks fulfillment scenarios.
