

# Bitrix Site Manager ASP.NET 5.5

## Features and Tools

## Main Product Features

### Handy Tools For Web Development

Bitrix Site Manager ASP.NET delivers a number of ready-to-use modules (including search, blogs, forums, media player, photo gallery, online store, advertising and social networking) that allow to quickly develop a full-featured web application.

### Streamlined Installation

The product distribution automatically deploys third-party supplementary software (.NET framework, Ajax, SQL Express) necessary for the normal operation. Installation wizard gently guides through the set up and configuration process.

### Moderate System Requirements

Bitrix Site Manager ASP.NET is among the industry leaders in terms of system requirements. It can run on legacy operating systems like Windows XP Professional, support free Microsoft SQL Express database and compatible with a wide range of browsers. Even a comprehensive web application will require a decent amount of memory.

### Robust Security

Bitrix Site Manager ASP.NET is the only .NET development framework with integrated Web Application Firewall protecting your

applications against hostile web environment including SQL injections and XSS/CSRF attacks. Flexible user access management ensures flexible web application policy enforcement.

### Web Application Templates

Bitrix Site Manager ASP.NET contains a set of web templates to speed up the development of standard web projects like online shop, community site, product showcase and corporate site.

### Leading Usability

The adaptive interface stores the developer's activity patterns and settings and creates a portable personal workspace that brings personal preferences to any computer and browser.

### Multi-Site Support

Bitrix Site Manager ASP.NET allows development of distributed and comprehensive web projects featuring centralized management from a single management console.

### Multi-Language Support

UTF-8 support, extendable multi-lingual administration console and public interface with opportunity to easily connect additional languages create a truly international environment.

## Features and Tools Summary

### Main Module

Control every inch of your web site territory! The Main Module manages the whole web site structure and its components.
